

I strongly oppose the proposed rule making in regard to forcing radio stations to record their programming and retain it for 60 to 90 days. This would create a significant capital hardship on our small market operations, and I feel this would be an act of punishing all for the sins of a few. For our small market stations, this would be a terrible hardship.

Our stations have never had one single complaint filed with the FCC, and I would urge you to reconsider this proposed rule-making.
